

Contains **NO Chlorinated Solvents**
(NO 1,1,1-Trichloroethane)

Sprays as a deep penetrating liquid that flows into areas which are difficult to lubricate. Then, as the solvent carrier evaporates, the liquid forms into a grease that is resistant to high temperature and pressure.

After setting up, the grease will not wash away with water or steam and will resist water throwoff and heavy shock load. Withstands acid, salt spray and oxidation.

USE ON:

Wire rope, open gears, linkages, draglines, fittings, winches, cranes, cams, valves, cables, hoists, pulleys and rollers.

DIRECTIONS:

Spray first spray up close to flush off old grease and dirt build up. Then spray a thin film on surface to be lubricated. Liquid will creep and penetrate then gel in approximately 20 minutes.
