

DESCRIPTION:

This powerful and efficient emulsifying agent is designed to liquefy sewerage and garbage grease in drain lines, lift stations, wetwells and sewerage plants. This product contains excellent deodorant properties and eliminates the odor at its source by liquefying accumulations of grease, oils, fatty acids and calcium soaps.

DIRECTIONS:

Drain Lines, Grease Traps: Add 1 quart to 1 gallon of water and pour into drain or trap (after 15 minutes flush with water if possible). Repeat procedure on a bi-weekly basis. Larger drains and traps may require more product.

Garbage Trucks and Dumpsters: Wash with a solution of 1 part product to 25 gallons of water. Scrub with a brush and pressure rinse with clear water.

Sewer Lines: Add product directly into force mains and sewer lines as needed to remove grease and reduce odors.

Lift Stations, Wetwells: Add 20 to 25 gallons of product. Let penetrate and emulsify, then rinse with sufficient amounts of water. Also, product may drip directly into wetwell and pumping station to dissolve grease and reduce odors.

Sewerage Plants: Spray directly on accumulations of grease or scum blanket. Follow with 500 to 1000 gallons of water. Consult your supervisor for further assistance.

UNIT OF MEASURE: U.S. GALLONS

DC-500™

Grease Trap and Sewer Cleaner

- REDUCES ODORS
- DISSOLVES EMULSIFIED GREASE AND SLIME
- HIGHLY CONCENTRATED

WARNING:

KEEP OUT OF REACH OF CHILDREN.
FOR INDUSTRIAL AND INSTITUTIONAL USE ONLY.
(SEE RIGHT PANEL FOR ADDITIONAL CAUTIONS AND FIRST AID STATEMENTS.)
