READ MATERIAL SAFETY DATA SHEET BEFORE USE

**NET CONTENTS: ONE U.S. QUART**

<b>NFPA</b> 	<b>HAZARD RATING:</b> 4-EXTREME 3-HIGH 2-MODERATE 1-SLIGHT	<b>Proper Shipping Name:</b> Consumer Commodity, ORM-D.

**IMPORTANT: READ ENTIRE LABEL BEFORE USING**

Never use or mix with other drain cleaners or chemical before, during or after using this drain opener since it may still be present if drain did not completely clear and the drain opener may react with such products. Never use a plunger or pressurized drain pipe opener during or after use of drain opener because it may still be present if drain not completely clean. Splash back of lye can burn skin and eyes. Clean up all spilled material at once. If empty do not reuse container. Rinse with water and replace cap firmly before discarding.

**DESCRIPTION**

This drain opener will dissolve hair, loosen clogged food and other organic matter. It may be poured through standing water. It will not harm pipes, porcelain or disposals.

**DIRECTIONS**

Open carefully without squeezing bottle. Pour slowly into clogged drain. Do not splash in eyes, on skin or clothing. After use, replace cap tightly. Keep children, hands and face away from sinks while drain opener is in use. When flushing with hot water from tap, carefully avoid splashing.

For clogged drains- No need to remove standing water. Use 1/2 gallon (64 oz.). Allow 30 minutes to work. Flush with hot water. Repeat if necessary and allow to stand for 1 hour before flushing.

For stubborn clogs, let stand overnight before flushing.

For slow running drains -Use 1/3 gallon (42 oz.). Let stand 15 minutes. Repeat application two more times, then flush with hot water after final application.

For garbage disposal drains- Follow same directions as for other drains. If the drain doesn't clear do not turn disposal on since splash back may occur- consult a plumber. After drain clears, flush with warm water while disposal is running.

To keep drains clear and free running -Use 1/4 gallon (32 oz.) at regular weekly intervals. Let stand at least 15 minutes and flush with hot water.
