

DESCRIPTION:

Film Fyter is an advanced detergent system specifically formulated for the removal of road soils from passenger cars, trucks and many other types of transportation vehicles. It quickly liquefies and lifts away road film, grease, oil, fuel residues, carbon stains, industrial residues, insects and other similar types of soils. Special rinse additives facilitate quick and complete rinsing.

Formulated For Maximum Flexibility.....

Film Fyter is formulated for complete effectiveness as a single stage cleaner. Additionally, you will find that **Film Fyter** is perfectly suitable for use in a two stage system. Your Wechem representative will gladly recommend a highly compatible and synergistic multistage product for use with **Film Fyter**.

DIRECTIONS:

Ideal product dilutions will vary in accordance with operating conditions. Utilize the information below as a starting guide for product use.

Non Friction or Frictionless Type Tunnel Washes:

Low Pressure Presoak Application (40-90 PSI): Dilute **Film Fyter** 1 part to 100 parts water, and apply to vehicle surface. Allow 15-20 seconds of dwell time before rinsing. Adjust if necessary to accommodate operating conditions.

High Pressure Wash & Prep Application (600-1500 PSI): Dilute **Film Fyter** 1 part to 400 parts water.

Conventional Friction & Hybrid Type Tunnel Washes:

Dilution and application will depend upon the type of equipment used. Consult your Wechem representative for assistance.

NOTICE: **Film Fyter** is a powerful detergent system and should only be used with automated cleaning or dilution control systems. It should not be used undiluted, or at dilutions of less than 1 part in 30 parts water.

UNIT OF MEASURE: U.S. GALLONS

FILM FYTER™

Professional Strength Vehicle Detergent System
