

DESCRIPTION:

Halo is a special blend of high foaming detergent agents and special acidic compounds which will effectively and dramatically improve the exterior appearance of passenger vehicles when used according to label directions. It was formulated for use as a replacement to "show foam" products that are commonly used in professional car wash tunnel operations. Most "show foam" products are used exclusively for customer appeal and service value reinforcement. Halo provides the additional benefit of removing all acid soluble soils resulting in a dramatically cleaner surface, increased vehicle shine, and brighter chrome and glass surfaces. These soils are typically not removed by standard alkaline formulations.

Halo will effectively remove paint oxides, metal oxides, chrome oxides, industrial fall out, water spots, mineral stains, and other acid soluble soils. Halo will not adversely effect painted surfaces when used according to label directions.

Halo was formulated to provide additional cleaning benefits in normal tunnel configurations. It should be used in sequence after the proper application of a one-step alkaline presoak detergent. Contact your Wechem technical sales consultant for use suggestions and compatible products for use with the Halo product system.

DIRECTIONS:

Halo must be diluted with water prior to use. Actual working dilutions will vary according to soil conditions and operational considerations. Operator should adjust dilution rate until desired foam level and optimal cleaning results are achieved. Normal dilutions will vary from 1 part Halo to 50 parts water, up to 1 part Halo to 125 parts water. Recommended dilution starting point is 1 to 75.

Note: Halo must be diluted a minimum of 1 to 35 with water. Do not allow Halo to dry on vehicle surface.

UNIT OF MEASURE: U.S. GALLONS

HALO™

*High Foaming
Acidic Cleaning Agent*

**Enhances Luminescent Qualities
of Vehicle Surfaces**

**KEEP OUT OF REACH OF CHILDREN.
FOR INDUSTRIAL AND INSTITUTIONAL USE ONLY.
(SEE RIGHT PANEL FOR ADDITIONAL CAUTIONS AND
FIRST AID STATEMENTS.)**

☠ DANGER-POISON ☠

WARNING:

Harmful if swallowed or inhaled. Causes eye irritation. May cause skin irritation. Do not mix with any other cleaner or chemical.

FIRST AID:

EYES: Flush with water for at least 15 minutes. Seek medical attention.

SKIN: Wash with soap and water. If irritated, seek medical attention.

INGESTION: DO NOT INDUCE VOMITING. Drink two large glasses of water. Get immediate medical attention.

INHALATION: Remove to fresh air. Resuscitate if necessary. Get medical attention.

CONTAINS:	CAS:
Oxalic Acid.....	144-62-7
Phosphoric Acid.....	7664-38-2

NFPA

HAZARD RATING:

- 4-EXTREME
- 3-HIGH
- 2-MODERATE
- 1-SLIGHT
