

DESCRIPTION:

Wechem's Max Wax is a rich blend of cleaners, carnauba and other fine imported waxes, and two durable polymer resins. It cleans, restores and protects even the most oxidized surfaces. Perfectly suited for cars, trucks, boats, planes and nearly every other type of painted, coated, fiberglass, plexiglass, aluminum or chrome surface. Max Wax contains no phosphates or harsh abrasives making it safe for all finishes. It may even be used on decals and painted insignia. Inhibits color fading and removes some light scratches.

DIRECTIONS:

Shake Well Before Using. Do not apply in direct sunlight or to a hot surface. Work small sections at a time. For your protection safety glasses are recommended while using this product.

Hand Use: Pour Max Wax onto a wax applicator and apply to surface, rubbing well in a circular motion. Allow to dry, then wipe to a high luster. Keep turning cloth while wiping down.

Orbital Use: Apply Max Wax to bonnet. Turn on orbital and spread product over surface. Allow to dry, then buff to a high gloss with a clean bonnet.

High Speed Buffer: apply Max Wax to a wax applicator and spread uniformly over small area of surface before buffing. Buff with adequate pressure. As product dries, reduce pressure and burnish to a high gloss. Clean pad at regular intervals.
