

DESCRIPTION:

Polar Solv is a premium liquid cleaner formulated specifically for use in areas with low temperatures, especially temperatures below 32°F where ordinary cleaners would freeze. Eliminates the need to shut down equipment for cleaning. May be used full strength for extremely low temperatures (-40° F) or diluted for greater economy. No rinsing is required. Leaves no film or residue. This formulation contains no dye or fragrance and will not impart flavor, color, or odor to food products when used as directed. Safe for use on all metal surfaces. Ideal for cleaning all non food contact surfaces in freezers, coolers, dairy cases, cold rooms, loading docks, and refrigerated trucks. Recommended for use in food processing plants, food storage facilities, cold storage facilities, supermarkets, restaurants, schools, and refrigerated vehicles and trailers.

This formulation contains no Ethylene Glycol Monobutyl Ether, commonly known as "Butyl".

DIRECTIONS:

Apply **Polar Solv** as supplied in the container or in diluted form directly to soiled areas with agitation using an automatic floor scrubber, mop, brush, spray, flood, rag, or other convenient method. Agitate and let sit 5 to 10 minutes. Remove residue with vacuum, wiping or mopping. No rinsing is required.

General Dilution Guide*

Temperatures	Polar Solv	Water (parts)
As low as -25°F	1 part	1 part
As low as +10°F	1 part	2 parts
Above +32°	1 part	10 parts

*This product is ready-to-use and is generally used as supplied in the container. Diluted concentrations of **Polar Solv** are offered as a guide and are based upon 10-minute maximum surface contact time. If diluted solutions freeze on floor, remove with undiluted **Polar Solv**.

POLAR SOLV®
