

# HULK SYSTEM™ SOLO PROGRAM

## The Ultimate Single Source HyperConcentrate for Use in Refineries and Offshore

### HULK SYSTEM™ SOLO PROGRAM

The Hulk System Program was formulated as replacement technology for consumers in petrochemical industry who purchase large quantities of detergents/degreasers to use on offshore drilling platforms, dive support vessels, construction vessels, refineries, etc, in bulk tanks, totes, or multiple drums. It utilizes the latest chemical technology to simplify the transportation, storage, and use of detergents while drastically reducing all associated costs.

The Hulk System Solo Program is our latest introduction into the Hulk family. These Hulk formulations utilize a single 100% active hyper concentrate to deliver its cost slashing benefits.

#### LOOK AT THESE ADVANTAGES

##### Save Money

This new technology is so effective that there is no doubt the Hulk System will save you money. Even if your current product is working just fine, let us show you what an equivalent Hulk Solo System formula will cost. Guaranteed - we'll save you money!

##### Stop Buying Water

Eliminate the single most unnecessary cost associated with cleaning detergents/degreasers - someone else's water! When you use the Hulk Solo System, you buy only the parts you need: active ingredients. Since the water is eliminated, freight and handling costs are only a fraction of conventional methods.

##### Eliminate Hazards

If your current product is stored in bulk tanks, you have the potential for a substantial chemical spill. Because the Hulk System uses smaller containers of hyper concentrates, the chance of a catastrophic spill is virtually eliminated.

If you are using drums, you know that disposal of empty drums can be a big problem. Let the Hulk System reduce your *drum slum*.

##### Save Space - up to 90%

Let's face it: bulk tanks take up a lot of space. The Hulk System DDU uses only 10% of the space consumed by bulk tanks and even less if you are buying in drums.

Construction Vessel

#### The Best Chemistry

The Hulk System Solo Program utilizes the most advanced chemical cleaning system available on the market. Our single stage hyper concentrates are 100% active and contain no water. Check out our available formulations listed on the backside of this brochure. After you try the Hulk Solo Program, you'll find it hard to purchase detergents/degreasers any other way. We're so confident, we invite you to compare our formulations side by side with the competition.

#### Environmental Awareness

Everyone is aware of the increased and continued concern over the environment. The ingredients in the Hulk System detergents/degreasers were carefully selected because of their environmental friendliness. All of the available formulations are naturally biodegradable and have infinite solubility in water. These formulations offer real advantages over toxic solvent-based compounds.

#### How the System Works

Our Hulk System Solo DDU is kept at the final job site and is connected to an available water source. The unit works by water action alone, no electrical connections are needed. The container of hyper concentrate is placed beneath the dispenser and a supply hose is positioned inside the container. As water flows through the unit, the dispenser pulls the right amount of hyper concentrate into the mixing chamber where it is mixed with your water and dispensed through the discharge hose.

Drilling Rig

Refinery

Offshore Supply Ship

The user simply opens and closes a valve on the discharge tubing when detergent/degreaser concentrate is needed. It's that simple. Now you have an industrial detergent/degreaser concentrate that is biodegradable, non-flammable and infinitely soluble in water.

## HULK SYSTEM™

You'll appreciate our attention to detail...

### REGULATORY COMPLIANCE

If your facility uses chemical compounds, you are subject to significant regulatory statutes. Our staff has gone the extra mile to ensure that the necessary documentation needed for industrial grade products is provided.

### Labeling

OSHA regulations require that all primary packaged products and most secondary work containers contain specific hazard communication information. Hulk System labels contain all the information necessary to comply with prescribed regulations. Information provided includes: product description, product use directions, cautions and warnings, first aid information, N.F.P.A. symbol, and D.O.T. shipping information. We will provide you with labels for your secondary containers to assure proper product safety and performance.

### Material Safety Data Sheets

As a user of industrial grade chemicals, you must meet very specific requirements of OSHA's hazardous communication standard. Material Safety Data Sheets (MSDS) are a big part of this requirement. When you order your Hulk System containers, you will receive the MSDS documents required for compliance. In addition, when we change or update the MSDS you will receive the new version with your next order. Of course you may call us anytime and request a current copy.

### Dependability

With our Hulk System, you get proven quality from a leader in the industry. We have been perfecting our products for the last thirty years, so you can depend on us to give you consistent chemistry with every cleaning application. We also offer customized cleaning programs, in-service demonstrations and employee training on chemical awareness. Please call us for your presentation on how we can save you worry, time and most importantly: money.

**Hulk System Solo Detergent Dispensing Unit (DDU):** The innovative single stage product system guarantees quality detergent/degreaser on a consistent basis.

### Hulk System Solo Program formulations available:

The Hulk Solo formulations use the most advanced detergent/degreaser system available on the market. Available in a wide range of pH alternatives, we feel confident there is a Solo formula to meet your needs. Common characteristics include: Optimized Surfactant, Readily Biodegradable, Phosphate Free, Gentle on Paint, Oil/ Water Separator Safe, and Highly Effective at Hydrocarbon Removal.

#### Hulk Solo Formula 109

Formula 109 is highly effective detergent system specifically formulated to quickly remove and emulsify tough industrial and instructional soils. Formulated with more alkalinity, pH 13, this is the product of choice for really tough cleaning jobs. Contains no caustics and remains suitable for cleaning most painted industrial surfaces. Color: Blue; Fragrance: None

#### Hulk Solo Formula 250

Formula 250 is a highly effective alkaline detergent system specifically formulated to remove the toughest industrial grime. This fast acting formulation will quickly penetrate, cut through, and emulsify tough industrial and institutional soils. With pH (>13) it is ideally suited for cleaning a wide variety of soils from most hard durable surfaces. It only utilizes components that are readily biodegradable. Color: Red; Fragrance: None

#### Hulk Solo Formula 300

Formula 300 is a combination of alkaline builders, water soluble solvents and superior surfactants to handle the toughest of cleaning applications for water based type degreasers. Quickly cuts through heavy soiled surfaces with a PH (>13) utilizing components that are readily biodegradable. Color: Purple; Fragrance: None

#### Hulk Solo Formula 400

Formula 400 is a highly active, environmentally safe, solvent based material hyper-concentrate specifically designed for heavy duty degreasing in refineries, petrochemical and on offshore platforms. When used as directed, this material will produce large quantities of concentrated solvent degreaser. Color: Yellow; Fragrance: Citrus

#### Hulk Solo Formula 500

Formula 500 is a highly active, solvent based material hyper-concentrate specifically designed for heavy duty degreasing in refineries, petrochemical and on offshore platforms. Color: Yellow; Fragrance: Petroleum

#### Environmentally Safe "ES" Hulk Solo Formula 101ES, 103ES, 109ES, 250, and 400:

These highly active "Green Formulations" are designed to reduce your environmental reporting requirements as they do not contain any ingredients that are listed under "EPA's SARA Title III, Section 313".
